Dear adults,

To help develop and embed children's fluency in mathematics, we ask them to learn Key Instant Recall Facts - KIRFS. They should be practised 3 times a week for maximum retention.

I have amended these lists of KIRFs from another school to break up the learning across the school year. They are intended to be challenging and it is intended that children will be taught the necessary maths in lessons alongside them.

This is a redraft amended to the needs arising from the last few years, so may a long way from perfect, but with these skills embedded, more of the children's working memory is available. This means more 'brain space' to be available for new methods and concepts to be understood, rather than them struggling to calculate facts learnt earlier in their school careers.

I hope these help you to support your children's Maths learning. Please let me know if I can help further or if you have any questions by emailing me at:

Lisa.kraushaar@roundwoodprimary.herts.sch.uk.

It has been a good year at Roundwood and from what I have seen, the children have settled well into Maths lessons and made some super progress in their learning. Well done children!

Kind regards, Mrs. Kraushaar

### Year 1 - Autumn 1

#### I know my numbers to 10

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

It's the first half term and the children will need a lot of time to adjust to new routines, so just consolidate the knowledge of numbers 1-10 in different contexts and representations.

You could have a number of the day – there will be songs and activities online I'm sure

If your number of the day is 2 ...

What do you find in 2s?

Where can you see a 2?

Show me 2 fingers/ blocks/teddies

What is 2 more than 5 Use resources to check

2

#### **Top Tips**

Keep an eye out for numbers all around... Maths is everywhere!

<u>Use practical resources</u> – Your child has one shoe on then puts on the other, how many do they have on now?

<u>Play games</u> – You can play number games online at

## Year 1 - Autumn 2

#### I know number bonds for each number to 6.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

0 + 1 = 1	0 + 4 = 4	0 + 6 = 6
1+0=1	1 + 3 = 4	1 + 5 = 6
	2 + 2 = 4	2 + 4 = 6
0 + 2 = 2	3 + 1 = 4	3 + 3 = 6
1 + 1 = 2	4 + 0 = 4	4 + 2 = 6
2 + 0 = 2		5 + 1 = 6
	0 + 5 = 5	6 + 0 = 6
0 + 3 = 3	1 + 4 = 5	
1 + 2 = 3	2 + 3 = 5	
2 + 1 = 3	3 + 2 = 5	
3 + 0 = 3	4 + 1 = 5	
	5 + 0 = 5	

#### **Key Vocabulary**

What is 3 add 2?

What is 2 plus 2?

What is 5 take away 2?

What is 1 less than 4?

They should be able to answer these questions in any order, including missing number questions e.g.  $3 + \bigcirc = 5$  or  $4 - \bigcirc = 2$ .

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Use practical resources</u> – Your child has one potato on their plate and you give them three more. Can they predict how many they will have now?

Play games – You can play number games online at

# Key Instant Recall Facts Year 1 - Spring 1

#### I know doubles and halves of numbers to 10.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

0 + 0 = 0	
1 + 1 = 2	½ of 0 = 0
2 + 2 = 4	½ of 2 = 1
3 + 3 = 6	½ of 4 = 2
4 + 4 = 8	½ of 6 = 3
5 + 5 = 10	½ of 8 = 4
6 + 6 = 12	½ of 10 = 5
7 + 7 = 14	

8 + 8 = 16

9 + 9 = 18

10 + 10 = 20

#### **Key Vocabulary**

What is double 9?

What is half of 6?

What is 10 the double of?

What is 7 half of?

Children should do this practically and line up objects to start to see patterns in the numbers

#### Top Tips

The secret to success is practising **little** and **often**. Use time wisely as we are all busy.

Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Ping Pong</u> – In this game, the parent says, "Ping," and the child replies, "Pong." Then the parent says a number and the child doubles it. For a harder version, the adult can say, "Pong." The child replies, "Ping," and then halves the next number given.

Play games – You can play number games online at

# Key Instant Recall Facts Year 1 – Spring 2

#### I know number bonds to 10.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

0 + 10 = 10	2 + 8 = 10	4 + 6 = 10
10 + 0 = 10	8 + 2 = 10	6 + 4 = 10
10 - 10 = 0	10 - 8 = 2	10 - 6 = 4
10 - 0 = 10	10 - 2 = 8	<b>10 – 4 = 6</b>
1 + 9 = 10	3 + 7 = 10	5 + 5 = 10
9 + 1 = 10	7 + 3 = 10	10 - 5 = 5
10 - 9 = 1	10 - 7 = 3	
40 4 0		
10 - 1 = 9	10 - 3 = 7	

#### **Key Vocabulary**

What is 3 add 2?

What is 2 plus 2?

What is 5 take away 2?

What is 1 less than 4?

They should be able to answer these questions in any order, including missing number questions e.g.  $6 + \bigcirc = 10$  or  $10 - \bigcirc = 3$ .

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Use practical resources</u> – Your child has one potato on their plate and you give them two more. Can they predict how many they will have now? <u>Make a poster</u> – We use Numicon at school. You can find pictures of the Numicon shapes here: bit.ly/NumiconPictures – your child could make a poster showing the different ways of making 5.

<u>Play games</u> – You can play number games online at

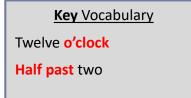

### Year 1 – Summer 1

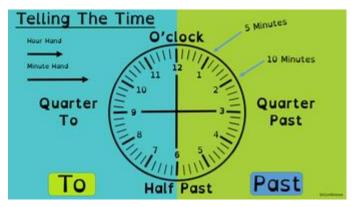

#### I can tell the time.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

Children need to be able to tell the time using a clock with hands. This target can be broken down into several steps.

- I can tell the time to the nearest hour.
- I can tell the time to the nearest half hour.

The secret to success is practising little and often.

<u>Talk about time</u> - Discuss what time things happen. When does your child wake up? What time do they eat breakfast? Make sure that you have an analogue clock visible in your house or that your child wears a watch with hands.

<u>Play "What's the time Mr Wolf?"</u> – You could also give your child some responsibility for watching the clock :

#### Read books about time

<u>Play games</u> – You can play number games online at

### Year 1 – Summer 2

#### I know number bonds for each number to 10.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

0 + 7 = 7	0 + 8 = 8	0 + 9 = 9	0 + 10 = 10
1 + 6 = 7	1 + 7 = 8	1 + 8 = 9	1 + 9 = 10
2 + 5 = 7	2 + 6 = 8	2 + 7 = 9	2 + 8 = 10
3 + 4 = 7	3 + 5 = 8	3 + 6 = 9	3 + 7 = 10
4 + 3 = 7	4 + 4 = 8	4 + 5 = 9	4 + 6 = 10
5 + 2 = 7	5 + 3 = 8	5 + 4 = 9	5 + 5 = 10
6 + 2 = 8	6 + 2 = 8	6 + 3 = 9	6 + 4 = 10
7 + 1 = 8	7 + 1 = 8	7 + 2 = 9	7 + 3 = 10
8 + 0 = 8	8 + 0 = 8	8 + 1 = 9	<b>8 + 2 = 10</b>
		9 + 0 = 9	9 + 1 = 10
L			10 + 0 = 10

#### **Key Vocabulary**

What do I add to 5 to make 10?

What is 10 take away 6?

What is 3 less than 10?

How many more than 2 is 10?

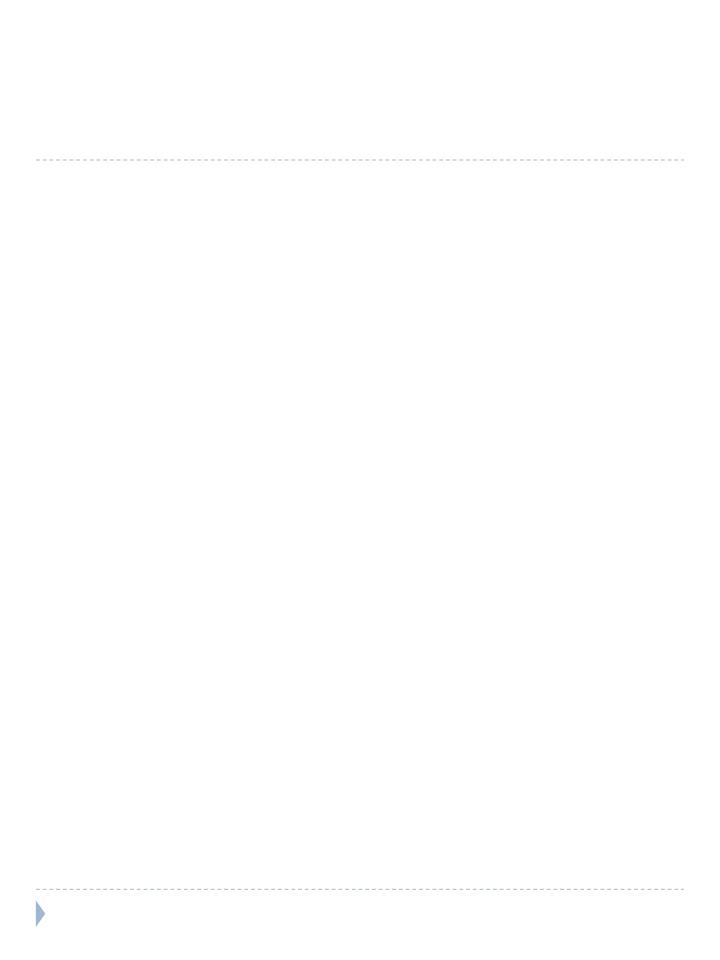

They should be able to answer these questions in any order, including missing number

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Play games</u> – You can play number games online at

questions e.g. 1 + 0 = 10 or 9 - 0 = 8.

### Year 2 – Autumn 1

#### I know number bonds to 20.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

0 + 20 = 20	20 + 0 = 20	20 - 0 = 20	20 - 20 = 0
1 + 19 = 20	19 + 1 = 20	20 - 1 = 19	20 – 19 = 1
2 + 18 = 20	18 + 2 = 20	20 - 2 = 18	20 - 18 = 2
3 + 17 = 20	17 + 3 = 20	20 - 3 = 17	20 - 17 = 3
4 + 16 = 20	16 + 4 = 20	20 - 4 = 16	20 - 16 = 4
5 + 15 = 20	<b>15 + 5 = 20</b>	20 - 5 = 15	20 - 15 = 5
6 + 14 = 20	14 + 6 = 20	20 - 6 = 14	20 - 14 = 6
7 + 13 = 20	13 + 7 = 20	20 - 7 = 13	20 - 13 = 7
8 + 12 = 20	12 + 8 = 20	20 - 8 = 12	20 - 12 = 8
9 + 11 = 20	11 + 9 = 20	20 - 9 = 11	20 - 11 = 9
10 + 10 = 20		20 - 10 = 10	

#### **Key Vocabulary**

What do I add to 5 to make 20?

What is 20 take away 6?

What is 3 less than 20?

How many more than 16 is 20?

They should be able to answer these questions in any order, including missing number questions e.g.  $19 + \bigcirc = 20$  or  $20 - \bigcirc = 8$ .

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Use what you already know</u> – Use number bonds to 10 (e.g. 7 + 3 = 10) to work out related number bonds to 20 (e.g. 17 + 3 = 20).

<u>Use practical resources</u> – Make collections of 20 objects. Ask questions such as, "How many more conkers would I need to make 20?"

<u>Make a poster</u> – We use Numicon at school. You can find pictures of the Numicon shapes here: bit.ly/NumiconPictures – your child could make a poster showing the different ways of making 20.

<u>Play games</u> – You can play number games online at

### Year 2 – Autumn 2

#### I know the multiplication and division facts for the 2 times table.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

$2 \times 1 = 2$	2 ÷ 2 = 1
$2 \times 2 = 4$	$4 \div 2 = 2$
$2\times 3=6$	$6 \div 2 = 3$
$2 \times 4 = 8$	$8 \div 2 = 4$
$2 \times 5 = 10$	$10 \div 2 = 5$
$2 \times 6 = 12$	$12 \div 2 = 6$
$2 \times 7 = 14$	$14 \div 2 = 7$
$2 \times 8 = 16$	$16 \div 2 = 8$
$2 \times 9 = 18$	$18 \div 2 = 9$
$2 \times 10 = 20$	$20 \div 2 = 10$
2 × 11 = 22	22 ÷ 2 = 11
$2 \times 12 = 24$	$24 \div 2 = 12$

#### **Key Vocabulary**

What is 2 multiplied by 7?

What is 2 times 9?

What is 12 divided by 2?

They should be able to answer these questions in any order, including missing number questions e.g.  $2 \times \bigcirc = 8$  or  $\bigcirc \div 2 = 6$ .

#### Top Tips

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Songs and Chants</u> – You can buy Times Tables CDs or find multiplication songs and chants online. If your child creates their own song, this can make the times tables even more memorable.

<u>Test the Parent</u> – Your child can make up their own tricky division questions for you e.g. *What is 18 divided by 2?* They need to be able to multiply to create these questions.

<u>Use memory tricks</u> – For those hard-to-remember facts, <u>www.multiplication.com</u> has some strange picture stories to help children remember.

<u>Play games</u> – You can play number games online at

# Key Instant Recall Facts Year 2 - Spring 1

#### I know doubles and halves of numbers to 20.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

0 + 0 = 0	$\frac{1}{2}$ of 0 = 0	
1 + 1 = 2	½ of 2 = 1	11 + 11 = 22
2 + 2 = 4	½ of 4 = 2	12 + 12 = 24
3 + 3 = 6	½ of 6 = 3	13 + 13 = 26
4 + 4 = 8	½ of 8 = 4	14 + 14 = 28
<b>5 + 5 = 10</b>	½ of 10 = 5	<b>15 + 15 = 30</b>
6 + 6 = 12	½ of 12 = 6	16 + 16 = 32
7 + 7 = 14	½ of 14 = 7	<b>17 + 17 = 34</b>
8 + 8 = 16	½ of 16 = 8	18 + 18 = 36
9 + 9 = 18	½ of 18 = 9	19 + 19 = 38
10 + 10 = 20	½ of 20 = 10	20 + 20 = 40

#### **Key Vocabulary**

What is double 9?

What is half of 14?

What is 4 half of?

What I sa6 double of?

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Use what you already know</u> – Encourage your child to find the connection between the 2 times table and double facts.

<u>Ping Pong</u> – In this game, the parent says, "Ping," and the child replies, "Pong." Then the parent says a number and the child doubles it. For a harder version, the adult can say, "Pong." The child replies, "Ping," and then halves the next number given.

Play games – You can play number games online at

# Key Instant Recall Facts Year 2 - Spring 2

#### I know the multiplication and division facts for the 10 times table.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

$10 \times 1 = 10$	$10 \div 10 = 1$
$10 \times 2 = 20$	20 ÷ 10 = 2
$10 \times 3 = 30$	$30 \div 10 = 3$
$10 \times 4 = 40$	$40 \div 10 = 4$
$10 \times 5 = 50$	$50 \div 10 = 5$
$10 \times 6 = 60$	$60 \div 10 = 6$
$10 \times 7 = 70$	$70 \div 10 = 7$
$10 \times 8 = 80$	$80 \div 10 = 8$
$10 \times 9 = 90$	$90 \div 10 = 9$
$10 \times 10 = 100$	$100 \div 10 = 10$
10 × 11 = 110	$110 \div 10 = 11$
$10 \times 12 = 120$	$120 \div 10 = 12$

#### **Key Vocabulary**

What is 10 multiplied by 3?

What is 10 times 9?

What is 70 divided by 10?

They should be able to answer these questions in any order, including missing number questions e.g.  $10 \times \bigcirc = 80$  or  $\bigcirc \div 10 = 6$ .

#### Top Tips

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Songs and Chants</u> – You can buy Times Tables CDs or find multiplication songs and chants online. If your child creates their own song, this can make the times tables even more memorable.

<u>Test the Parent</u> – Your child can make up their own tricky division questions for you e.g. What is 70 divided by 7? They need to be able to multiply to create these questions.

<u>Apply these facts to real life situations</u> – How many toes are in your house? What other multiplication and division questions can your child make up?

<u>Play games</u> – You can play number games online at <a href="https://www.topmarks.co.uk/maths-games/5-7-years/counting">https://www.topmarks.co.uk/maths-games/5-7-years/counting</a>

### Year 2 - Summer 1

#### I know the multiplication and division facts for the 5 times table.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

$5 \times 1 = 5$	$5 \div 5 = 1$
$5 \times 2 = 10$	$10 \div 5 = 2$
$5 \times 3 = 15$	$15 \div 5 = 3$
$5\times 4=20$	$20 \div 5 = 4$
$5 \times 5 = 25$	$25 \div 5 = 5$
$5 \times 6 = 30$	$30 \div 5 = 6$
$5 \times 7 = 35$	$35 \div 5 = 7$
$5\times8=40$	$40 \div 5 = 8$
$5\times9=45$	$45 \div 5 = 9$
$5 \times 10 = 50$	$50 \div 5 = 10$
5 × 11 = 55	55 ÷ 5 = 11
$5 \times 12 = 60$	$60 \div 5 = 12$

#### **Key Vocabulary**

What is 5 multiplied by 7?

What is 5 times 9?

What is 60 divided by 5?

They should be able to answer these questions in any order, including missing number questions e.g.  $5 \times \bigcirc = 40$  or  $\bigcirc \div 5 = 9$ .

#### Top Tips

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Spot patterns</u> – What patterns can your child spot in the 5 times table? Are there any similarities with the 10 times table?

<u>Test the Parent</u> – Your child can make up their own tricky division questions for you e.g. *What is 45 divided by 5?* They need to be able to multiply to create these questions.

<u>Use memory tricks</u> – For those hard-to-remember facts, www.multiplication.com has some strange picture stories to help children remember.

Play games – You can play number games online at

### Year 2 - Summer 2

#### I can tell the time.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

Children need to be able to tell the time using a clock with hands. This target can be broken down into several steps.

- I can tell the time to the nearest hour.
- I can tell the time to the nearest half hour.
- I can tell the time to the nearest quarter hour.
- I can tell the time to the nearest five minutes – if they are secure with the others.

#### **Key Vocabulary**

Twelve o'clock

Half past two

**Quarter past three** 

Quarter to nine

Five past one

Twenty-five to ten

#### Top Tips

The secret to success is practising **little** and **often**.

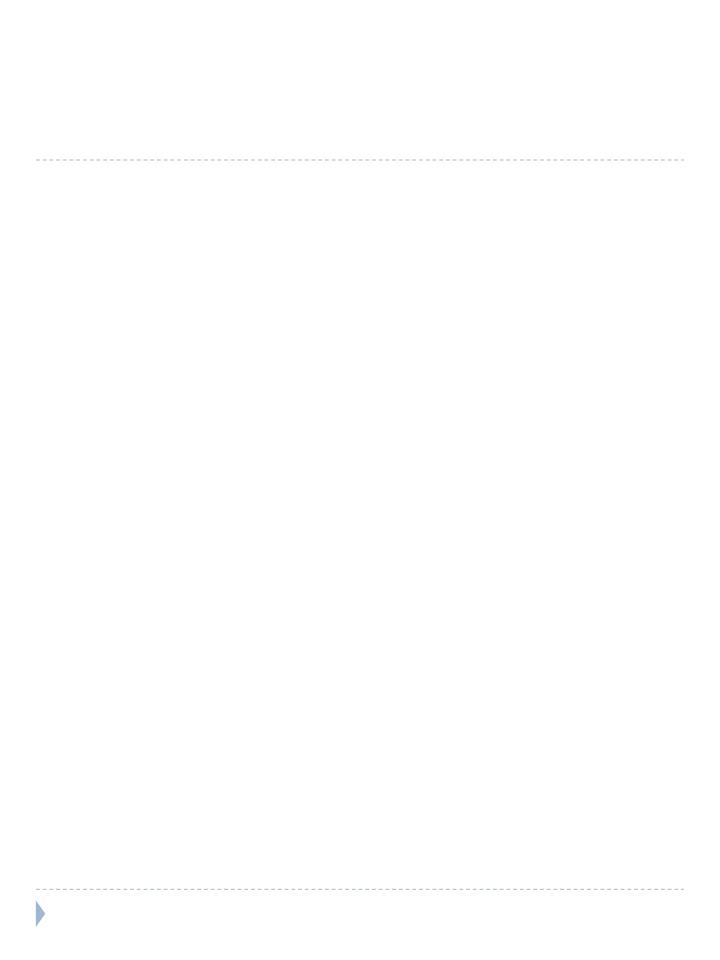

<u>Talk about time</u> - Discuss what time things happen. When does your child wake up? What time do they eat breakfast? Make sure that you have an analogue clock visible in your house or that your child wears a watch with hands.

<u>Ask your child the time regularly</u> – You could also give your child some responsibility for watching the clock:

"The cakes need to come out of the oven at quarter past four."

"We need to leave the house at half past eight."

Play games – You can play number games online at

### Year 3 – Autumn 1

#### I know number bonds for all numbers to 20.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

2 + 9 = 11 3 + 8 = 11	5 + 9 = 14 6 + 8 = 14	Example of a fact family $6 + 9 = 15$	
4 + 7 = 11	7 + 7 = 14	9 + 6 = 15 15 - 9 = 6	<u>K</u> (
5 + 6 = 11 3 + 9 = 12	6 + 9 = 15 7 + 8 = 15	15 – 9 = 6	What do I What is 17
4 + 8 = 12 5 + 7 = 12	7 + 9 = 16 8 + 8 = 16	Examples of other facts	What is 13
6 + 6 = 12 4 + 9 = 13 5 + 8 = 13	8 + 9 = 17 9 + 9 = 18	4 + 5 = 9 $13 + 5 = 18$ $19 - 7 = 12$	How man What is th 9 and 13?
6 + 7 = 13		10 – 6 = 4	

#### **Key Vocabulary**

What do I add to 5 to make 19?

What is 17 take away 6?

What is 13 less than 15?

How many more than 8 is 11?

What is the **difference** between 9 and 13?

This list includes the most challenging facts but children will need to learn **all** number bonds for each number to 20 (e.g. 15 + 2 = 17). This includes related subtraction facts (e.g. 17 - 2 = 15).

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

Buy one get three free - If your child knows one fact (e.g. 8 + 5 = 13), can they tell you the other three facts in the same fact family?

<u>Use doubles and near doubles</u> – If you know that 6 + 6 = 12, how can you work out 6 + 7? What about 5 + 7?

#### Play games – You can play number games online at

### Year 3 – Autumn 2

#### I know the multiplication and division facts for the 3 and 4 times table.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

```
3 \times 1 = 3
                    1 \times 3 = 3
                                      3 \div 3 = 1
                                                        3 \div 1 = 3
                                                                          4 \times 1 = 4
                                                                                             1 \times 4 = 4
                                                                                                               4 \div 4 = 1
                                                                                                                                 4 \div 1 = 4
                                                                          4 \times 2 = 8
                                                                                            2 \times 4 = 8
                                                                                                               8 \div 4 = 2
                                                                                                                                 8 \div 2 = 4
 3 \times 2 = 6
                   2 \times 3 = 6
                                      6 \div 3 = 2
                                                        6 \div 2 = 3
 3 \times 3 = 9
                                                       9 \div 3 = 3
                                                                         4 \times 3 = 12
                                                                                           3 \times 4 = 12
                                                                                                              12 \div 4 = 3
                                                                                                                                12 \div 3 = 4

3 \times 9 = 27
                  9 \times 3 = 27
                                    27 \div 3 = 9
3 \times 10 = 30 \quad 10 \times 3 = 30
                                                                        4 \times 10 = 40
                                                                                           10 \times 4 = 40
                                                                                                             40 \div 4 = 10
                                                                                                                               40 \div 10 = 4
                                    30 \div 3 = 10 \quad 30 \div 10 = 3
                                    33 \div 3 = 11
                                                                        4 \times 11 = 44
                                                                                                                               44 \div 11 = 4
3 \times 11 = 33
                 11 \times 3 = 33
                                                      33 \div 11 = 3
                                                                                           11 \times 4 = 44
                                                                                                             44 \div 4 = 11
                                                      36 \div 12 = 3
                                                                        4 \times 12 = 48
                                                                                                            48 \div 4 = 12
                                                                                                                               48 \div 12 = 4
3 \times 12 = 36
                 12 \times 3 = 36
                                    36 \div 3 = 12
                                                                                           12 \times 4 = 48
```

They should be able to answer these questions in any order, including missing number questions e.g.  $4 \times \bigcirc = 16$  or  $\bigcirc \div 4 = 7$ 

$$3 \times \bigcirc = 21 \text{ or } \bigcirc \div 3 = 4.$$

#### Top Tips

#### **Key Vocabulary**

What is 4 multiplied by 4?

What is 8 times 4?

What is 24 divided by 4?

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact family of the day.

What do you already know? – Your child will already know many of these facts from the 2, 3, 5 and 10 times tables.

<u>Double and double again</u> – Multiplying a number by 4 is the same as doubling and doubling again. Double 6 is 12 and double 12 is 24, so  $6 \times 4 = 24$ .

Play games – You can play number games online at

# Key Instant Recall Facts Year 3 – Spring 1

#### I can recall facts about durations of time.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

#### Number of days in each month

There are 60 seconds in a minute.	I a a comme	24	tealer.	24
There are 60 minutes in an hour.	January	31	July	31
There are 24 hours in a day.	February	28/29	August	31
There are 7 days in a week.	March	31	September	30
There are 12 months in a year.	April	30	October	31
There are 365 days in a year.	May	31	November	30
There are 366 days in a leap year.	June	30	December	31

Children also need to know the order of the months in a year. They should be able to apply these facts to answer questions, such as:

What day comes after 30th April?

What day comes before 1st February?

Do you know the knuckles trick?

#### Top Tips

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Use rhymes and memory games</u> – The rhyme, *Thirty days hath September*, can help children remember which months have 30 days. There are poems describing the months of the year in order.

<u>Use calendars</u> – If you have a calendar for the new year, your child could be responsible for recording the birthdays of friends and family members in it. Your child could even make their own calendar.

<u>How long is a minute?</u> – Ask your child to sit with their eyes closed for exactly one minute while you time them. Can they guess the length of a minute? Carry out different activities for one minute. How many times can they jump in sixty seconds?

# Key Instant Recall Facts Year 3 – Spring 2

#### I know the multiplication and division facts for the 6 times table.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

```
6 \times 1 = 6
                   I \times 6 = 6
                                    6 \div 6 = 1
                                                      6 \div 1 = 6
6 \times 2 = 12
                  2 \times 6 = 12
                                    12 \div 6 = 2
                                                     12 \div 2 = 6
                  3 \times 6 = 18
                                    18 \div 6 = 3
6 \times 3 = 18
                                                   18 \div 3 = 6
6 \times 4 = 24
                                   24 \div 6 = 4
                                                     24 \div 4 = 6
                 4 \times 6 = 24
6 \times 5 = 30
                  5 \times 6 = 30
                                   30 \div 6 = 5
                                                     30 \div 5 = 6
6 \times 6 = 36
                  6 \times 6 = 36
                                   36 \div 6 = 6
                                                     36 \div 6 = 6
6 \times 7 = 42
                 7 \times 6 = 42
                                   42 \div 6 = 7 42 \div 7 = 6
6 \times 8 = 48
                 8 \times 6 = 48
                                   48 \div 6 = 8
                                                     48 \div 8 = 6
6 \times 9 = 54
                 9 \times 6 = 54 54 \div 6 = 9
                                                   54 \div 9 = 6
6 \times 10 = 60 \quad 10 \times 6 = 60 \quad 60 \div 6 = 10 \quad 60 \div 10 = 6
6 \times 11 = 66 \quad |1 \times 6 = 66 \quad 66 \div 6 = |1 \quad 66 \div |1 = 6
6 \times 12 = 72 12 \times 6 = 72 72 \div 6 = 12 72 \div 12 = 6
```

#### **Key Vocabulary**

What is 3 multiplied by 6?

What is 8 times 6?

What is 24 divided by 6?

They should be able to answer these questions in any order, including missing number questions e.g.  $6 \times \bigcirc = 18$  or  $\bigcirc \div 6 = 11$ .

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact family of the day.

<u>Songs and Chants</u> – You can buy Times Tables CDs or find multiplication songs and chants online. If your child creates their own song, this can make the times tables even more memorable.

<u>Warning!</u> – When creating fact families, children sometimes get confused by the order of the numbers in the division number sentence. It is tempting to say that the biggest number goes first, but it is more helpful to say that the answer to the multiplication goes first, as this will help your child more in later years when they study fractions, decimals and algebra.

E.g.  $3 \times 12 = 36$ . The answer to the multiplication is 36, so  $36 \div 3 = 12$  and  $36 \div 12 = 3$ 

<u>Play games</u> – You can play number games online at <a href="https://www.topmarks.co.uk/maths-games/7-11-years/ordering-and-sequencing">https://www.topmarks.co.uk/maths-games/7-11-years/ordering-and-sequencing</a>

### Year 3 - Summer 1

#### I know the multiplication and division facts for the 8 times table.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

```
8 \times 1 = 8
                 1 \times 8 = 8
                                   8 \div 8 = 1
                                                    8 \div 1 = 8
8 \times 2 = 16
                 2 \times 8 = 16
                                   16 \div 8 = 2
                                                    16 \div 2 = 8
8 \times 3 = 24
                 3 \times 8 = 24
                                   24 \div 8 = 3
                                                    24 \div 3 = 8
8 \times 4 = 32
                 4 \times 8 = 32
                                                    32 \div 4 = 8
                                   32 \div 8 = 4
8 \times 5 = 40
                 5 \times 8 = 40
                                   40 \div 8 = 5
                                                    40 \div 5 = 8
8 \times 6 = 48
                6 \times 8 = 48
                                  48 \div 8 = 6
                                                    48 \div 6 = 8
8 \times 7 = 56
                7 \times 8 = 56
                                  56 \div 8 = 7
                                                   56 \div 7 = 8
8 \times 8 = 64
                8 \times 8 = 64
                                   64 \div 8 = 8
                                                    64 \div 8 = 8
8 \times 9 = 72
                9 \times 8 = 72
                                  72 \div 8 = 9
                                                  72 \div 9 = 8
8 \times 10 = 80 10 \times 8 = 80 80 \div 8 = 10 80 \div 10 = 8
8 \times 11 = 88 11 \times 8 = 88 88 \div 8 = 11
                                                   88 \div 11 = 8
8 \times 12 = 96
                12 \times 8 = 96
                                 96 \div 8 = 12 96 \div 12 = 8
```

#### **Key Vocabulary**

What is 8 multiplied by 8?

What is 8 times 8?

What is 24 divided by 8?

They should be able to answer these questions in any order, including missing number questions e.g.  $8 \times \bigcirc = 16$  or  $\bigcirc \div 8 = 7$ .

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact family of the day.

<u>Songs and Chants</u> – You can buy Times Tables CDs or find multiplication songs and chants online. If your child creates their own song, this can make the times tables even more memorable.

<u>Five six seven eight</u> – fifty-six is seven times eight ( $56 = 7 \times 8$ ).

<u>Double your fours</u> – Multiplying a number by 8 is the same as multiply by 4 and then doubling the answer.  $8 \times 4 = 32$  and double 32 is 64, so  $8 \times 8 = 64$ .

<u>Use memory tricks</u> – For those hard-to-remember facts, www.multiplication.com has some strange picture stories to help children remember.

<u>Play games</u> – You can play number games online at <a href="https://www.topmarks.co.uk/maths-">https://www.topmarks.co.uk/maths-</a>

### Year 3 – Summer 2

#### I can tell the time.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

Children need to be able to tell the time using a clock with hands. This target can be broken down into several steps.

- I can tell the time to the nearest hour.
- I can tell the time to the nearest half hour.
- I can tell the time to the nearest quarter hour.
- I can tell the time to the nearest five minutes.
- I can tell the time to the nearest minute.

#### **Key Vocabulary**

Twelve o'clock

Half past two

**Quarter past** three

Quarter to nine

Five past one

Twenty-five to ten

#### Top Tips

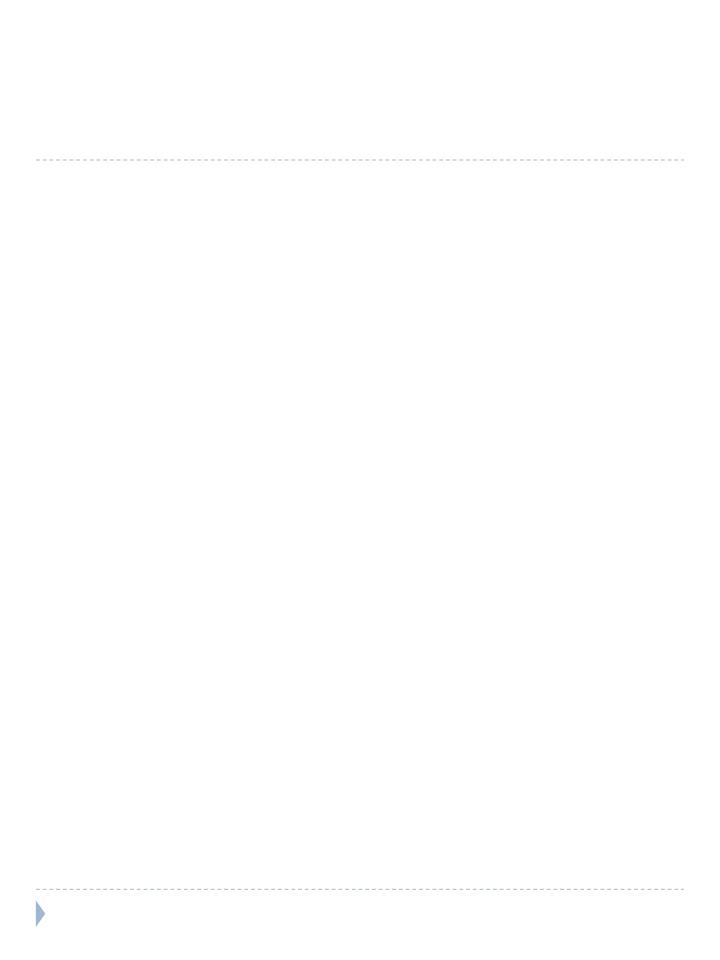

The secret to success is practising little and often. Use time wisely.

<u>Talk about time</u> - Discuss what time things happen. When does your child wake up? What time do they eat breakfast? Make sure that you have an analogue clock visible in your house or that your child wears a watch with hands. Once your child is confident telling the time, see if you can find more challenging clocks e.g. with Roman numerals or no numbers marked.

<u>Ask your child the time regularly</u> – You could also give your child some responsibility for watching the clock :

"The cakes need to come out of the oven at twenty-two minutes past four exactly." "We need to leave the house at twenty-five to nine."

<u>Play games</u> – You can play number games online at <a href="https://www.topmarks.co.uk/maths-games/7-11-years/ordering-and-sequencing">https://www.topmarks.co.uk/maths-games/7-11-years/ordering-and-sequencing</a>

### Year 4 – Autumn 1

#### I know number bonds to 100.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

#### Some examples:

60 + 40 = 100	<b>37 + 63 = 100</b>
40 + 60 = 100	63 + 37 = 100
100 - 40 = 60	100 - 63 = 37
100 - 60 = 40	100 - 37 = 63
<b>75 + 25 = 100</b>	48 + 52 = 100
<b>25 + 75 = 100</b>	<b>52 + 48 = 100</b>
100 - 25 = 75	100 - 52 = 48
100 - 75 = 25	100 - 48 = 52

#### **Key Vocabulary**

What do I add to 65 to make 100?

What is 100 take away 6?

What is 13 less than 100?

How many more than 98 is 100?

What is the **difference** between 89 and 100?

This list includes some examples of facts that children should know. They should be able to answer questions including missing number questions e.g.  $49 + \bigcirc = 100$  or  $100 - \bigcirc = 72$ .

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

Buy one get three free - If your child knows one fact (e.g. 8 + 5 = 13), can they tell you the other three facts in the same fact family?

<u>Use number bonds to 10</u> - How can number bonds to 10 help you work out number bonds to 100?

Play games – You can play number games online at

## Year 4 - Autumn 2

#### I know the multiplication and division facts for the 9 and 11 times tables.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

```
9 \times 1 = 9
                     9 \div 9 = 1
                                       | | \times | = | |
                                                           11 \div 11 = 1
                                       11 \times 2 = 22
                                                           22 \div 11 = 2
 9 \times 2 = 18
                     18 \div 9 = 2
                                       11 \times 3 = 33
 9 \times 3 = 27
                    27 \div 9 = 3
                                                          33 \div 11 = 3
 9 \times 4 = 36
                    36 \div 9 = 4
                                       |1| \times 4 = 44 44 \div |1| = 4
 9 \times 5 = 45
                    45 \div 9 = 5
                                       11 \times 5 = 55
                                                           55 \div 11 = 5
 9 \times 6 = 54
                    54 \div 9 = 6
                                       11 \times 6 = 66
                                                         66 ÷ 11 = 6
 9 \times 7 = 63
                    63 \div 9 = 7
                                     | | \times 7 = 77
                                                        77 ÷ | | = 7
 9\times8=72
                                      11 \times 8 = 88
                    72 \div 9 = 8
                                                        88 \div 11 = 8
 9 \times 9 = 81
                    81 \div 9 = 9
                                      | | \times 9 = 99
                                                          99 \div 11 = 9
9 \times 10 = 90
                    90 \div 9 = 10
                                      11 \times 10 = 110
                                                        110 \div 11 = 10
9 \times 11 = 99
                    99 \div 9 = 11
                                      |1| \times |1| = |2|
                                                          |21 \div |1| = |1|
9 \times 12 = 108
                   108 \div 9 = 12
                                     11 \times 12 = 132
                                                        |32 \div 11 = 12|
```

#### **Key Vocabulary**

What is 8 multiplied by 6?

What is 6 times 8?

What is 24 divided by 6?

They should be able to answer these questions in any order, including missing number questions e.g.  $9 \times \bigcirc = 54$  or  $\bigcirc \div 9 = 11$ .

#### Top Tips

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact family of the day.

<u>Look for patterns</u> – These times tables are full of patterns for your child to find. How many can they spot?

<u>Use your ten times table</u> – Multiply a number by 10 and subtract the original number (e.g.  $7 \times 10 - 7 = 70 - 7 = 63$ ). What do you notice? What happens if you add your original number instead? (e.g.  $7 \times 10 + 7 = 70 + 7 = 77$ )

What do you already know? – Your child will already know many of these facts from the 2, 3, 4, 5, 6, 8 and 10 times tables. It might be worth practising these again!

Play games – You can play number games online at <a href="https://www.topmarks.co.uk/maths-">https://www.topmarks.co.uk/maths-</a>

# Key Instant Recall Facts Year 4 – Spring 1

#### I know the multiplication and division facts for the 6 times table.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

```
12 \times 1 = 12
                     1 \times 12 = 12
                                         12 \div 12 = 1
                                                             12 \div 1 = 12
 12 \times 2 = 24
                     2 \times 12 = 24
                                         24 \div 12 = 2
                                                             24 \div 2 = 12
                                         36 \div 12 = 3
 12 \times 3 = 36
                     3 \times 12 = 36
                                                             36 \div 3 = 12
 12 \times 4 = 48
                    4 \times 12 = 48
                                         48 \div 12 = 4
                                                             48 \div 4 = 12
 12 \times 5 = 60
                     5 \times 12 = 60
                                         60 \div 12 = 5
                                                             60 \div 5 = 12
                                                             72 \div 6 = 12
 12 \times 6 = 72
                     6 \times 12 = 72
                                        72 \div 12 = 6
 12 \times 7 = 84
                    7 \times 12 = 84
                                         84 \div 12 = 7
                                                            84 \div 7 = 12
 12 \times 8 = 96
                     8 \times 12 = 96
                                        96 \div 12 = 8
                                                             96 \div 8 = 12
                    9 \times 12 = 108
                                        108 \div 12 = 9
                                                            108 \div 9 = 12
12 \times 9 = 108
12 \times 10 = 120 10 \times 12 = 120 120 \div 12 = 10
                                                           120 \div 10 = 12
12 \times 11 = 132 11 \times 12 = 132
                                      132 \div 12 = 11
                                                           132 \div 11 = 12
```

 $12 \times 12 = 144$   $12 \times 12 = 144$ 

#### **Key Vocabulary**

What is 8 multiplied by 12?

What is 12 times 8?

What is 24 divided by 12?

They should be able to answer these questions in any order, including missing number questions e.g.  $12 \times \bigcirc = 72$  or  $\bigcirc \div 12 = 7$ .

#### **Top Tips**

 $144 \div 12 = 12$   $144 \div 12 = 12$ 

The secret to success is practising **little** and **often**. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact family of the day.

<u>Double your sixes</u> – Multiplying a number by 12 is the same as multiplying by 6 and then doubling the answer.  $7 \times 6 = 42$  and double 42 is 84, so  $7 \times 12 = 84$ .

Buy one get three free – If your child knows one fact (e.g.  $3 \times 6 = 18$ ), can they tell you the other three facts in the same fact family?

<u>Warning!</u> – When creating fact families, children sometimes get confused by the order of the numbers in the division number sentence. It is tempting to say that the biggest number goes first, but it is more helpful to say that the answer to the multiplication goes first, as this will help your child more in later years when they study fractions, decimals and algebra.

E.g.  $7 \times 12 = 84$ . The answer to the multiplication is 84, so  $84 \div 12 = 7$  etc.

Play games – You can play number games online at

# Key Instant Recall Facts Year 4 – Spring 2

#### I know the multiplication and division facts for the 7 times table.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

$7 \times 1 = 7$	$1 \times 7 = 7$	$7 \div 7 = 1$	$7 \div 1 = 7$
$7 \times 2 = 14$	$2 \times 7 = 14$	$14 \div 7 = 2$	$14 \div 2 = 7$
$7 \times 3 = 21$	$3 \times 7 = 21$	$21 \div 7 = 3$	$21 \div 3 = 7$
$7 \times 4 = 28$	$4\times7=28$	$28 \div 7 = 4$	$28 \div 4 = 7$
$7 \times 5 = 35$	$5 \times 7 = 35$	$35 \div 7 = 5$	$35 \div 5 = 7$
$7 \times 6 = 42$	$6 \times 7 = 42$	$42 \div 7 = 6$	$42 \div 6 = 7$
$7 \times 7 = 49$	$7 \times 7 = 49$	$49 \div 7 = 7$	$49 \div 7 = 7$
$7 \times 8 = 56$	$8\times7=56$	$56 \div 7 = 8$	$56 \div 8 = 7$
$7 \times 9 = 63$	$9 \times 7 = 63$	$63 \div 7 = 9$	$63 \div 9 = 7$
$7 \times 10 = 70$	$10 \times 7 = 70$	$70 \div 7 = 10$	$70 \div 10 = 7$
7 × 11 = 77	$11 \times 7 = 77$	77 ÷ 7 = 11	77 ÷ 11 = 7
$7 \times 12 = 84$	$12 \times 7 = 84$	$84 \div 7 = 12$	84 ÷ 12 =7

#### **Key Vocabulary**

What is 7 multiplied by 6?

What is 7 times 8?

What is 84 divided by 7?

They should be able to answer these questions in any order, including missing number questions e.g.  $7 \times \bigcirc = 28$  or  $\bigcirc \div 6 = 7$ .

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact family of the day.

<u>Songs and Chants</u> – You can buy Times Tables CDs or find multiplication songs and chants online. If your child creates their own song, this can make the times tables even more memorable.

<u>Order of difficulty</u> – Ask your child to order these facts from the easiest to the most challenging. Can they explain why some facts are easier to remember? Then focus on practising the most challenging facts.

<u>Use memory tricks</u> – For those hard-to-remember facts, www.multiplication.com has some strange picture stories to help children remember.

<u>Play games</u> – You can play number games online at <a href="https://www.topmarks.co.uk/maths-">https://www.topmarks.co.uk/maths-</a>

### Year 4 – Summer 1

#### I can recognise decimal equivalents of fractions.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

$$\frac{1}{2} = 0.5$$

$$\frac{1}{10} = 0.1$$

$$\frac{1}{100} = 0.01$$

$$\frac{1}{4} = 0.25$$

$$\frac{2}{10} = 0.2$$

$$\frac{7}{100} = 0.07$$

$$\frac{3}{4} = 0.75$$

$$\frac{5}{10} = 0.5$$

$$\frac{21}{100} = 0.21$$

$$\frac{6}{10} = 0.6$$

$$\frac{75}{100} = 0.75$$

$$\frac{9}{10} = 0.9$$

#### **Key Vocabulary**

How many tenths is 0.8?

How many **hundredths** is 0.12?

Write 0.75 as a fraction?

Write ¼ as a decimal?

Children should be able to convert between decimals and fractions for ½, ¼, ¾ and any number of tenths and hundredths.

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: start with tenths before moving on to hundredths.

<u>Play games</u> - Make some cards with pairs of equivalent fractions and decimals. Use these to play the memory game or snap. Or make your own dominoes with fractions on one side and decimals on the other.

Play games – You can play number games online at

## Year 4 – Summer 2

#### I can multiply and divide single-digit numbers by 10 and 100.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

$7 \times 10 = 70$	$30 \times 10 = 300$	$8 = 01 \times 8.0$
$10 \times 7 = 70$	$10 \times 30 = 300$	$10 \times 0.8 = 8$
$70 \div 7 = 10$	$300 \div 30 = 10$	$8 \div 0.8 = 10$
$70 \div 10 = 7$	$300 \div 10 = 30$	$8 \div 10 = 0.8$
6 × 100 = 600	40 × 100 = 4000	0.2 × 10 = 2
$100 \times 6 = 600$	$100 \times 40 = 4000$	$10 \times 0.2 = 2$
600 ÷ 6 = 100	$4000 \div 40 = 100$	$2 \div 0.2 = 10$
$600 \div 100 = 6$	$4000 \div 100 = 40$	$2 \div 10 = 0.2$

#### **Key Vocabulary**

What is 5 multiplied by 10?
What is 10 times 0.9?
What is 700 divided by 70?
hundreds, tens, units
tenths, hundredths

These are just examples of the facts for this term. Children should be able to answer these questions in any order, including missing number questions e.g.  $10 \times \bigcirc = 5$  or  $\bigcirc \div 10 = 60$ .

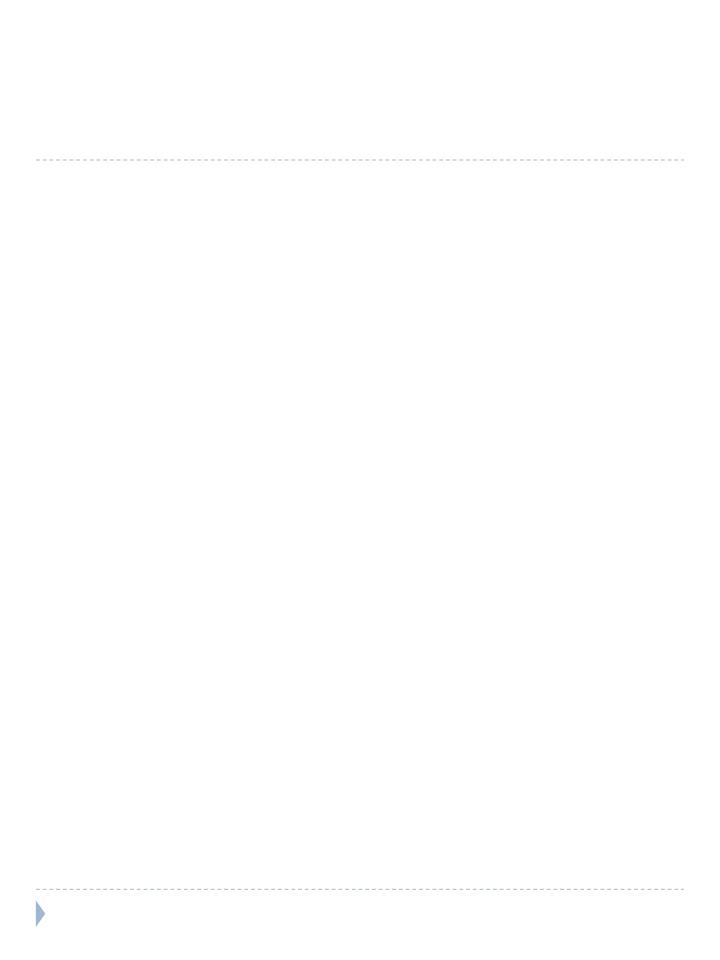

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact family of the day.

Lots of consolidation of times tables and associated division facts to be prepared for UKS2

There are plenty of games on the internet Hit the button is a favourite! https://www.topmarks.co.uk/maths-games/hit-the-button

#### Play games – You can play number games online at

## Year 5 - Autumn 1

#### **Converting measurements in time**

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

#### Number of days in each month

There are 60 seconds in a minute.	January	31	July	31
There are 60 minutes in an hour.	February	28/29	August	31
There are 24 hours in a day.	March	31	September	30
There are 7 days in a week.	April	30	October	31
There are 12 months in a year.	May	31	November	30
There are 365 days in a year.	June	30	December	31
There are 366 days in a lean year				

There are 366 days in a leap year.

They should be able to answer harder questions relating to number of days in multiple weeks, months in multiple years and questions relating to calendars

What date is 3 weeks after June 21st?

How many weeks in 2 years?

Try this game – level 3 is what you are aiming for

https://mathsframe.co.uk/en/resources/resource/261/using-a-calendar

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact family of the day.

<u>Speed Challenge</u> – Take two packs of playing cards and remove the kings. Turn over two cards and ask your child to multiply the numbers together (Ace = 1, Jack = 11, Queen = 12). How many questions can they answer correctly in 2 minutes? Practise regularly and see if they can beat their high score.

#### Play games – You can play number games online at

## Year 5 - Autumn 2

#### I can find factor pairs of a number.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

Children should now know all multiplication and division facts up to  $12 \times 12$ . So when given a number in one of these times tables, they should be able to state a factor pair which multiply to make this number. Below are some examples:

$24 = 4 \times 6$	$42 = 6 \times 7$
$24 = 8 \times 3$	$25 = 5 \times 5$
$56 = 7 \times 8$	$84 = 7 \times 12$
$54 = 9 \times 6$	$15 = 5 \times 3$

#### **Key Vocabulary**

Can you find a factor of 28?

Find two numbers whose **product** is 20.

I know that 6 is a factor of 72 because 6 multiplied by 12 equals 72.

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Play games</u> - There is an activity at <u>www.conkermaths.org</u> to practise finding factor pairs

<u>Think of the question</u> – One player thinks of a times table question (e.g.  $4 \times 12$ ) and states the answer. The other player has to guess the original question.

<u>Use memory tricks</u> – For those hard-to-remember facts, www.multiplication.com has some strange picture stories to help children remember.

<u>Play games</u> – You can play number games online at

# Key Instant Recall Facts Year 5 – Spring 1

#### I can identify prime numbers up to 20.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

A prime number is a number with no factors other than itself and one.

The following numbers are prime numbers:

2, 3, 5, 7, 11, 13, 17, 19

A composite number is divisible by a number other than 1 or itself.

The following numbers are composite numbers:

4, 6, 8, 9, 10, 12, 14, 15, 16, 18, 20

**Key Vocabulary** 

prime number

composite number

factor

multiple

Children should be able to explain how they know that a number is composite.

E.g. 15 is composite because it is a multiple of 3 and 5.

#### Top Tips

The secret to success is practising **little** and **often**. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

It's really important that your child uses mathematical vocabulary accurately. Choose a number between 2 and 20. How many correct statements can your child make about this number using the vocabulary above?

Make a set of cards for the numbers from 2 to 20. How quickly can your child sort these into prime and composite numbers? How many even prime numbers can they find? How many odd composite numbers?

Play games – You can play number games online at

# Key Instant Recall Facts Year 5 – Spring 2

### I can recall square numbers up to 12<sup>2</sup> and their square roots.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

$ ^2 =   \times   =  $	$\sqrt{1} = 1$
$2^2 = 2 \times 2 = 4$	$\sqrt{4} = 2$
$3^2 = 3 \times 3 = 9$	$\sqrt{9} = 3$
$4^2 = 4 \times 4 = 16$	$\sqrt{16} = 4$
$5^2 = 5 \times 5 = 25$	$\sqrt{25} = 5$
$6^2 = 6 \times 6 = 36$	· <u> </u>
$7^2 = 7 \times 7 = 49$	$\sqrt{36} = 6$
$8^2 = 8 \times 8 = 64$	$\sqrt{49} = 7$
$9^2 = 9 \times 9 = 81$	$\sqrt{64}$ = 8
$10^2 = 10 \times 10 = 100$	$\sqrt{81} = 9$
$ 1 ^2 =  1  \times  1  =  2 $	$\sqrt{100} = 10$
$12^2 = 12 \times 12 = 144$	$\sqrt{121} = 11$
	$\sqrt{144} = 12$

#### **Key Vocabulary**

What is 8 squared?

What is 7 multiplied by itself?

What is the square root of 144?

Is 81 a square number?

Children should also be able to recognise whether a number below 150 is a square number or not.

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Cycling Squares</u> – At <a href="http://nrich.maths.org/1151">http://nrich.maths.org/1151</a> there is a challenge involving square numbers. Can you complete the challenge and then create your own examples?

<u>Use memory tricks</u> – For those hard-to-remember facts, www.multiplication.com has some strange picture stories to help children remember.

Play games – You can play number games online at

# Key Instant Recall Facts Year 5 – Summer 1

#### I can recall metric conversions.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

1 kilogram = 1000 grams

1 kilometre = 1000 metres

1 metre = 100 centimetres

1 metre = 1000 millimetres

1 centimetre = 10 millimetres

1 litre = 1000 millilitres

They should also be able to apply these facts to answer questions. e.g. How many metres in 1½ km?

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

<u>Look at the prefixes</u> – Can your child work out the meanings of *kilo-, centi-* and *milli-*? What other words begin with these prefixes?

<u>Be practical</u> – Do some baking and convert the measurements in the recipe.

<u>How far?</u> – Calculate some distances using unusual measurements. How tall is your child in mm? How far away is London in metres?

<u>Play games</u> – You can play number games online at

## Year 5 – Summer 2

#### I know decimal number bonds to 1 and 10.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

#### Some examples:

0.6 + 0.4 = 1	3.7 + 6.3 = 10
0.4 + 0.6 = 1	6.3 + 3.7 = 10
1 - 0.4 = 0.6	10 - 6.3 = 3.7
1-0.6 = 0.4	10 - 3.7 = 6.3

0.75 + 0.25 = 1	4.8 + 5.2 = 10
0.25 + 0.75 = 1	5.2 + 4.8 = 10
1 - 0.25 = 0.75	10 - 5.2 = 4.8
1 - 0.75 = 0.25	10 - 4.8 = 5.2

#### **Key Vocabulary**

What do I add to 0.8 to make 1?

What is 1 take away 0.06?

What is 1.3 less than 10?

How many more than 9.8 is 10?

What is the **difference** between 0.92 and 10?

This list includes some examples of facts that children should know. They should be able to answer questions including missing number questions e.g.  $0.49 + \bigcirc = 10$  or  $7.2 + \bigcirc = 10$ .

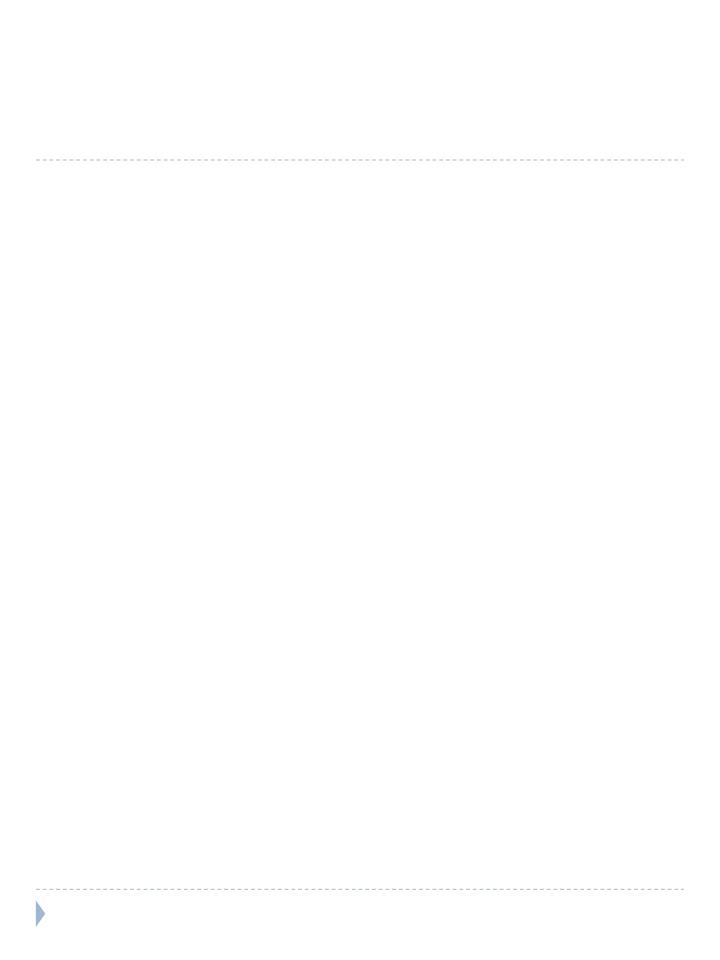

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

Buy one get three free - If your child knows one fact (e.g. 8 + 5 = 13), can they tell you the other three facts in the same fact family?

<u>Use number bonds to 10</u> - How can number bonds to 10 help you work out number bonds to 100?

<u>Play games</u> – You can play number games online at

# Key Instant Recall Facts Year 6 – Autumn 1

#### I know the multiplication and division facts for all times tables up to $12 \times 12$ .

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

This is a chance for Year 6 children to consolidate their knowledge of multiplication and division facts and to increase their speed of recall.

#### **Key Vocabulary**

What is 12 multiplied by 6?

What is 7 times 8?

What is 84 divided by 7?

They should be able to answer these questions in any order, including missing number questions e.g.  $7 \times \bigcirc = 28$  or  $\bigcirc \div 6 = 7$ .

Children who have already mastered their times tables should apply this knowledge to answer questions including decimals e.g.  $0.7 \times \bigcirc = 4.2$  or  $\bigcirc \div 60 = 0.7$ 

#### **Top Tips**

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact family of the day. Speed Challenge – Take two packs of playing cards and remove the kings. Turn over two cards and ask your child to multiply the numbers together (Ace = 1, Jack = 11, Queen = 12). How many questions can they answer correctly in 2 minutes? Practise regularly and see if they can beat their high score.

<u>Online games</u> – There are many games online which can help children practise their multiplication and division facts. <u>www.conkermaths.org</u> is a good place to start.

<u>Use memory tricks</u> – For those hard-to-remember facts, www.multiplication.com has some strange picture stories to help children remember.

<u>Play games</u> – You can play number games online at <a href="https://www.topmarks.co.uk/maths-games/7-11-years/ordering-and-sequencing">https://www.topmarks.co.uk/maths-games/7-11-years/ordering-and-sequencing</a>

### Year 6 - Autumn 2

#### I can convert between decimals, fractions and percentages.

By the end of this half term, children should know the following facts. The aim is for them

$$\frac{1}{2} = 0.5$$

$$\frac{1}{4} = 0.25$$

$$\frac{3}{4} = 0.75$$

$$\frac{1}{10} = 0.1$$

$$\frac{1}{5} = 0.2$$

$$\frac{3}{5} = 0.6$$

$$\frac{9}{10} = 0.9$$

$$\frac{1}{100} = 0.01$$

$$\frac{7}{100} = 0.07$$

$$\frac{21}{100} = 0.21$$

$$\frac{75}{100} = 0.75$$

$$\frac{99}{100} = 0.99$$

#### **Key Vocabulary**

How many tenths is 0.8?

How many **hundredths** is 0.12?

Write 0.75 as a fraction?

Write ¼ as a decimal?

Children should be able to convert between decimals and fractions for  $\frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{3}{4}$  and any number of tenths and hundredths.

#### Top Tips

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: start with tenths before moving on to hundredths.

<u>Play games</u> - Make some cards with pairs of equivalent fractions and decimals. Use these to play the memory game or snap. Or make your own dominoes with fractions on one side and decimals on the other.

Play games - You can play number games online at

# Key Instant Recall Facts Year 6 - Spring 1

#### I can identify prime numbers up to 50.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

Know all the equivalences for Fractions decimals and percentages

<u>Key Vocabulary</u>	
Fractions	
Decimals	
Percentages	
equivalence	

Children should be able to explain how they know that a number is composite.

E.g. 39 is composite because it is a multiple of 3 and 13.

1.0	100%
0.75	<b>75</b> %
0.6	66 <sup>2</sup> / <sub>3</sub> %
0.5	50%
0.3	<b>33</b> ⅓%
0.25	25%
0.2	20%
0.125	12½%
0.1	10%
0.01	1%
	0·75 0·6 0·5 0·3 0·25 0·2 0·125

#### Top Tips

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.

It's really important that your child uses mathematical vocabulary accurately. Choose a number between 2 and 50. How many correct statements can your child make about this number using the vocabulary above?

Make a set of cards for the numbers from 2 to 50. How quickly can your child sort these into prime and composite numbers? How many even prime numbers can they find? How many odd composite numbers?

Play games – You can play number games online at

# Key Instant Recall Facts Year 6 – Spring 2

#### I can identify common factors of a pair of numbers.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

The factors of a number are all numbers which divide it with no remainder.

E.g. the factors of 24 are 1, 2, 3, 4, 6, 8, 12, and 24. The factors of 56 are 1, 2, 4, 7, 8, 14, 28 and 56.

The common factors of two numbers are the factors they share.

E.g. the common factors of 24 and 56 are 1, 2, 4 and 8.

The greatest common factor of 24 and 56 is 8.

**Key Vocabulary** 

factor

common factor

multiple

greatest common factor

Children should be able to explain how they know that a number is a common factor. E.g. 8 is a common factor of 24 and 56 because  $24 = 8 \times 3$  and  $56 = 8 \times 7$ .

#### Top Tips

The secret to success is practising **little** and **often**. Use time wisely as we are all busy. Can you practise these KIRFs while walking to school or during a car journey? If your child is not yet confident with identifying factor pairs of a number, you may want to refer to the Year 5 Summer 2 sheet to practise this first.

There are many online games to practise finding the greatest common factor, for example:

http://www.fun4thebrain.com/beyondfacts/gcfsketch.html

Choose two numbers. Take it in turns to name factors. Who can find the most?

Play games – You can play number games online at

### Year 6 - Summer

What do you still need to practise?

Check back through the sheets and revisit any skills you are still not sure of.

#### **Key Vocabulary**

Check back through the boxes – are there any words you still don't know?

Secondary school beckons – the more of these skills you have the easier you will find the transition from Roundwood to your next school.

<u>Play games</u> – there are lots to choose from. Just think about all the fun we have had in lessons over your time here.

Happy Mathsing!
