

Supporting Pupils with Medical Conditions

Roundwood Primary School

Name of Policy	Supporting Pupils with Medical Conditions
Date of last review	1 st October 2026
Date of next review	Autumn 2027
Member of Staff Responsible	Headteacher
Approval	Safeguarding governor(s)

Notes:

Based on HCC model policy – Autumn 2021

Updated to reflect latest requirement that school holds 2 spare AAI devices for each relevant age group

This school is an inclusive community that supports and welcomes pupils with medical conditions.

- This school is welcoming and supportive of pupils with medical conditions. It provides children with medical conditions with the same opportunities and access to activities (both school based and out-of-school) as other pupils. No child will be denied admission or prevented from taking up a place in this school because arrangements for their medical condition have not been made.
- This school will listen to the views of pupils and parents/carers/carers.
- Pupils and parents/carers feel confident in the care they receive from this school and the level of that care meets their needs.
- Staff understand the medical conditions of pupils at this school and that they may be serious, adversely affect a child's quality of life and impact on their ability and confidence
- All staff understand their duty of care to children and young people and know what to do in the event of an emergency.
- The whole school & local health community understand and support the medical conditions policy.
- This school understands that all children with the same medical condition will not have the same needs, our school will focus on the needs of each individual child.
- The school recognises its duties as detailed in Section 100 of the Children and Families Act 2014 (and other relevant legislation, see DfE guidance p27). Some children with medical conditions may be considered to be disabled under the definition set out in the Equality Act 2010. Where this is the case, this school complies with their duties under that Act. Some may also have special educational needs (SEN) and may have a Education, Health and Care (EHC) plan which brings together health and social care needs, as well as their special educational provision. For children with SEN, this policy should be read in conjunction with the Special educational needs and disability (SEND) code of practice.

The medical conditions policy is supported by a clear communication plan for staff, parent/carers and other key stakeholders to ensure its full implementation.

- Pupils, parents/carers, relevant local healthcare staff, and other external stakeholders are informed of and reminded about the medical conditions policy through publication of this policy on the school website.

All staff understand and are trained in what to do in an emergency for children with medical conditions at this school.

- All school staff, including temporary or supply staff, are aware of the medical conditions at this school and understand their duty of care to pupils in an emergency.
- Staff receive training in what to do in an emergency and this is refreshed at least once a year for children with allergies. First aid training is provided to many staff with direct contact with children on a regular basis.
- All children with medical conditions that are complex, long-term or where there is a high risk that emergency intervention will be required at this school have an individual healthcare plan (IHP)¹, which explains what help they need in an emergency. The IHP will accompany a pupil should they need to attend hospital. Parental permission will be sought and recorded in the IHP for sharing the IHP within emergency care settings.
- This school makes sure that all staff providing support to a pupil have received suitable training and ongoing support to ensure that they have confidence to provide the necessary support and that they fulfil the requirements set out in the pupil's IHP. This should be provided by the specialist nurse/school nurse/other suitably qualified healthcare professional and/or parent/carer. The specialist nurse/school nurse/other suitably qualified healthcare professional will confirm their competence and this school keeps an up-to-date record of all training undertaken and by whom.
- This school has chosen to hold an emergency salbutamol inhaler for use by pupils who have been prescribed a reliever inhaler and for whom parental consent for its use has been obtained.
- This school holds two 'spare' emergency adrenaline auto-injectors (AAI) for children under 6, and two spare devices for children over 6 and adults. These are for use on children who are at risk of anaphylaxis but whose own device is not available or not working and where professional medical advice (such as contacting 999) is to use an EpiPen.

All staff understand and are trained in the school's general emergency procedures.

- All staff, including temporary or supply staff should be aware of the content of this policy, know what action to take in an emergency and receive updates at least yearly.

¹ An example template for an IHP has been produced by DfE - see template A.

<https://www.gov.uk/government/publications/supporting-pupils-at-school-with-medical-conditions--3>

- If a pupil needs to attend hospital, a member of staff (preferably known to the pupil) will stay with them until a parent/carer arrives, or accompany a child taken to hospital by ambulance. They will not take pupils to hospital in their own car.

This school has clear guidance on providing care and support and administering medication at school.

- This school understands the importance of medication being taken and care received as detailed in the pupil's IHP.
- Medication will only be administered when it would be detrimental to a child's health or school attendance not to do so.
- This school will make sure that there are sufficient members of staff who have been trained to administer the medication and meet the care needs of an individual child. This school will ensure that there are sufficient numbers of staff trained to cover any absences, staff turnover and other contingencies. This school's governing body has made sure that there is the appropriate level of insurance and liability cover in place.²
- This school will not give medication (prescription or non-prescription) to a child under 16 without a parent's written consent except in exceptional circumstances, and every effort will be made to encourage the pupil to involve their parent/carer, while respecting their confidentiality.
- When administering medication, for example pain relief, this school will check the maximum dosage and when the previous dose was given. Parents/carers will be informed.
- This school will make sure that a trained member of staff is available to accompany a pupil with a medical condition on an off-site visit, including overnight stays.
- Parents/carers at this school understand that they should let the school know immediately if their child's needs change.
- If a pupil misuses their medication, or anyone else's, their parent/carer is informed as soon as possible and the school's disciplinary procedures are followed.

This school has clear guidance on the storage of medication and equipment at school.

² For school's covered by HCC's insurance where an IHP is in place; parents have consented for the school to administer medication / meet other support needs as part of that plan; trained staff undertake these support needs and record keeping in relation to administration is robust then liability cover would be in place for common treatments administered by staff. (e.g. in relation to oral medication, inhalers, epi-pens, pre-packaged doses via injection etc.)

- This school makes sure that all staff understand what constitutes an emergency for an individual child and makes sure that emergency medication/equipment, e.g. asthma inhalers, epi-pens etc are readily available wherever the child is in the school and on off-site activities, and are not locked away.

- Pupils must not carry their own medication/equipment unless agreed with the School and parents/carers and there is specific reason why this cannot be stored in the medical room, which will be the School's default approach. This is to ensure no risk to the child or other children of medication being taken accidentally or incorrectly administered. Those pupils deemed competent to carry their own medication/equipment with them will be identified and recorded through the pupil's IHP in agreement with parents/carers.

- Pupils can carry controlled drugs only if they are deemed competent to do so, there is no risk to other children and the school has received confirmation of this from a medical professional, otherwise this school will store controlled drugs securely in a non-portable container, with only named staff having access. Staff at this school can administer a controlled drug to a pupil once they have had specialist training.

- This school will make sure that all medication is stored safely, and that staff supervising pupils with medical conditions know where they are at all times and have access to them immediately. Under no circumstances will medication be stored in first aid boxes.

- This school will only accept medication that is in date, labelled and in its original container including prescribing instructions for administration. The exception to this is insulin, which though must still be in date, will generally be supplied in an insulin injector pen or a pump.

- Parents/carers are asked to collect all medications/equipment at the end of the school term where appropriate, and to provide new and in-date medication at the start of each term.

- This school disposes of needles and other sharps in line with local policies. Sharps boxes are kept securely at school and will accompany a child on off-site visits. They are collected and disposed of in line with local authority procedures.

This school has clear guidance about record keeping.

- As part of the school's admissions process, parents/carers are asked if their child has any medical conditions. These procedures also cover transitional arrangements between schools.

- This school uses an IHP to record the support an individual pupil needs around their medical condition. The IHP is developed with the pupil (where appropriate), parent/carer, designated named member of school staff, specialist nurse (where appropriate) and relevant healthcare services. Where a child has SEN but does not have an EHC plan, their special educational needs are mentioned in their IHP. Appendix 2 is used to identify and agree the support a child needs and the development of an IHP.
- This school has a centralised register of IHPs, and an identified member of staff has the responsibility for this register when there are children with IHPs in the school.
- IHPs are regularly reviewed, at least every year or whenever the pupil's needs change.
- The pupil (where appropriate) parents/carers, specialist nurse and relevant healthcare services (where appropriate) hold a copy of the IHP. Other school staff are made aware of and have access to the IHP for the pupils in their care.
- This school makes sure that the pupil's confidentiality is protected.
- This school seeks permission from parents/carers before sharing any medical information with any other party.
- This school keeps an accurate record of all medication administered, including the dose, time, date and supervising staff.

This school ensures that the whole school environment is inclusive and favourable to pupils with medical conditions. This includes the physical environment, as well as social, sporting and educational activities.

- This school is committed to providing a physical environment accessible to pupils with medical conditions and pupils are consulted to ensure this accessibility. This school is also committed to an accessible physical environment for out-of-school activities.
- This school makes sure the needs of pupils with medical conditions are adequately considered to ensure their involvement in structured and unstructured activities, extended school activities and residential visits.

- All staff are aware of the potential social problems that pupils with medical conditions may experience and use this knowledge, alongside the school's anti bullying policy, to help prevent and deal with any problems. They use opportunities such as PSHE and science lessons to raise awareness of medical conditions to help promote a positive environment.
- This school understands the importance of all pupils taking part in off site visits and physical activity and that all relevant staff make reasonable and appropriate adjustments to such activities in order they are accessible to all pupils. This includes out-of-school clubs and team sports. Risk assessments will be conducted as part of the planning process to take account of any additional controls required for individual pupil needs.
- This school understands that all relevant staff are aware that pupils should not be forced to take part in activities if they are unwell. They should also be aware of pupils who have been advised to avoid/take special precautions during activity, and the potential triggers for a pupil's medical condition when exercising and how to minimise these.

This school makes sure that pupils have the appropriate medication/equipment/food with them during physical activity and offsite visits.

- This school makes sure that pupils with medical conditions can participate fully in all aspects of the curriculum and enjoy the same opportunities at school as any other child, and that appropriate adjustments and extra support are provided.
- All school staff understand that frequent absences, or symptoms, such as limited concentration and frequent tiredness, may be due to a pupil's medical condition.
- This school will not penalise pupils for their attendance if their absences relate to their medical condition.
- This school will refer pupils with medical conditions who are finding it difficult to keep up educationally to the SENCO who will liaise with the pupil (where appropriate), parent/carers and the pupil's healthcare professional.
- Pupils at this school learn what to do in an emergency.
- This school makes sure that a risk assessment is carried out before any out-of-school visit, including work experience and educational placements. The needs of pupils with medical conditions are considered during this process and plans are put in place for any additional medication, equipment or support that may be required.

This school is aware of the common triggers that can make common medical conditions worse or can bring on an emergency. The school is actively working towards reducing or eliminating these health and safety risks and has a written schedule of reducing specific triggers to support this.

- This school is committed to identifying and reducing triggers both at school and on out-of-school visits.
- School staff have been given training and written information on medical conditions which includes avoiding/reducing exposure to common triggers.
- The IHP details an individual pupil's triggers and details how to make sure the pupil remains safe throughout the whole school day and on out-of-school activities. Risk assessments are carried out on all out-of-school activities, taking into account the needs of pupils with medical needs.
- This school reviews all medical emergencies and incidents to see how they could have been avoided, and changes school policy according to these reviews. Incidents are reported to governors on a timely basis (Health & Safety is a standing agenda item at Governing Board meetings) and to HCC/external agencies as required.

Each member of the school and health community knows their roles and responsibilities in maintaining and implementing an effective medical conditions policy.

- This school works in partnership with all relevant parties including the pupil (where appropriate), parent/carer, school's governing body, all school staff, employers and healthcare professionals to ensure that the policy is planned, implemented and maintained successfully.
- Key roles and responsibilities are outlined in Appendix 1.

The medical conditions policy is regularly reviewed, evaluated and updated. Updates are produced every year.

Appendix 1

Model process for developing individual healthcare plans

Appendix 2

Roles and responsibilities

Governing bodies – must make arrangements to support pupils with medical conditions in school, including making sure that a policy for supporting pupils with medical conditions in school is developed and implemented. They should ensure that pupils with medical conditions are supported to enable the fullest participation possible in all aspects of school life. Governing bodies should ensure that sufficient staff have received suitable training and are competent before they take on responsibility to support children with medical conditions. They should also ensure that any members of school staff who provide support to pupils with medical conditions are able to access information and other teaching support materials as needed.

Headteacher – should ensure that their school's policy is developed and effectively implemented with partners. This includes ensuring that all staff are aware of the policy for supporting pupils with medical conditions and understand their role in its implementation. Headteachers should ensure that all staff who need to know are aware of the child's condition. They should also ensure that sufficient trained numbers of staff are available to implement the policy and deliver against all individual healthcare plans, including in contingency and emergency situations. Headteachers have overall responsibility for the development of individual healthcare plans. They should also make sure that school staff are appropriately insured and are aware that they are insured to support pupils in this way. They should contact the school nursing service in the case of any child who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse.

School staff – any member of school staff may be asked to provide support to pupils with medical conditions, including the administering of medicines, although they cannot be required to do so. Although administering medicines is not part of teachers' professional duties, they should take into account the needs of pupils with medical conditions that they teach. School staff should receive sufficient and suitable training and achieve the necessary level of competency before they take on responsibility to support children with medical conditions. Any member of school staff should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

School nurse – every school has access to school nursing services. They are responsible for notifying the school when a child has been identified as having a medical condition which will require support in school. Wherever possible, they will do this before the child starts at the school. They would not usually have an extensive role in ensuring that schools are taking appropriate steps to support children with medical conditions, but may support staff on implementing a child's

individual healthcare plan and provide advice and liaison, for example on training. School nurses can liaise with lead clinicians locally on appropriate support for the child and associated staff training needs - for example, there are good models of local specialist nursing teams offering training to local school staff, hosted by a local school. Community nursing teams will also be a valuable potential resource for a school seeking advice and support in relation to children with a medical condition.

Other healthcare professionals - including GPs, paediatricians, nurse specialists/community paediatric nurses – should notify the school nurse and work jointly when a child has been identified as having a medical condition that will require support at school. They may provide advice on developing healthcare plans. Anyone dealing with the medical care of a pupil in school should contact the named school nurse for that school to ensure a coordinated approach.

Pupils – with medical conditions will often be best placed to provide information about how their condition affects them. They should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their individual healthcare plan. Other pupils will often be sensitive to the needs of those with medical conditions.

Parents/carers – should provide the school with sufficient and up-to-date information about their child's medical needs. They may in some cases be the first to notify the school that their child has a medical condition. Parents/carers are key partners and should be involved in the development and review of their child's individual healthcare plan, and may be involved in its drafting. They should carry out any action they have agreed to as part of its implementation, eg provide medicines and equipment and ensure they or another nominated adult are contactable at all times.

Appendix 3

Emergency Salbutamol Inhaler

The school has chosen to hold an emergency salbutamol inhaler for use by pupils who have been prescribed a reliever inhaler and for whom written parental consent for its use has been obtained.

The protocol for the use of this inhaler is detailed below, following the Department of Health Guidance on the use of emergency salbutamol inhalers in schools (March 2015).

<https://www.gov.uk/government/publications/emergency-asthma-inhalers-for-use-in-schools>

The use, storage, care and disposal of the inhaler and spacers will follow the school's policy on supporting pupils with medical conditions. Specific guidance on storage and care is provided on page 12 of the Department of Health Guidance on the use of emergency salbutamol inhalers in schools.

The school hold a register of children prescribed an inhaler and this list is kept with the emergency inhaler.

Written parental consent is sought for the use of the emergency inhaler. Where consent is received the use of the emergency inhaler will be included in the pupil's IHP.

A record of use for the emergency inhaler will be kept and Parents/carers will be informed if their child has used the emergency inhaler.

Appropriate support and training has been provided to staff in line with the school's policy on supporting pupils with medical conditions.

The school's two volunteers for ensuring this protocol is followed are Faye Nicholson and Michelle Cain. They are to check on a monthly basis that the inhaler and spacers are present and in working order, and the inhaler has sufficient number of doses available; that replacement inhalers are obtained when expiry dates approach; replacement spacers are available following use;

The Emergency Inhaler is stored in the medical room and is clearly labelled to avoid confusion with a child's inhaler.

Emergency Adrenaline Auto-injector (AAI)

The school has chosen to hold "spare" AAI devices for emergency use on children who are at risk of anaphylaxis but whose own device is not available or not working.

These AAI(s) held by the school are not a replacement for a pupil's own AAI(s).

The protocol for the use of this is detailed below, following the Department of Health and Social Care AAI's in schools (September 2017).

<https://www.gov.uk/government/publications/using-emergency-adrenaline-auto-injectors-in-schools>

The use, storage, care and disposal of spare AAI(s) will follow the school's policy on supporting pupils with medical conditions. Specific guidance on storage and care is provided on page 12/13 of the Department of Health and Social Care Guidance on the use of AAI(s) in schools.

The school hold a register of children prescribed an AAI or where a doctor has provided a written plan recommending AAI(s) to be used in the event of anaphylaxis).

Written parental consent is sought for the use of the spare AAI as part of the pupil's IHP or as part of the consent to give medication process..

The spare AAI will only be used in pupils where both parental consent and medical authorisation has been provided.

A record of use of any AAI(s) will be kept and Parents/carers will be informed if their child has been administered an AAI and whether this was the school's spare or the pupil's own device.

Appropriate support and training has been provided to staff in the use of AAI(s) in line with the school's policy on supporting pupils with medical conditions.

All AAI devices including the spare AAI(s) are kept in a suitable location **in the medical room**. AAI(s) are not locked away and remain accessible and available for use and not more than 5 minutes from where they may be needed.

The spare AAI(s) are clearly labelled to avoid confusion with that prescribed to a named pupil.

The school's two volunteers for ensuring this protocol is followed are **Faye Nicholson and Michelle Cain** they are to check on a monthly basis the AAI(s) are present and in date and that replacement AAI(s) are obtained when expiry dates approach. Checks are documented on a spreadsheet containing devices details and expiry dates, along with checks on receipt of devices at the start of each term to ensure the school only accepts in date items.
